anonymous contributions total over
\$3,000,000.

New Location.

The new buildings will be located in Cambridge on the bank of the Charles river, in the picturesque Charles River basin, which is a water park of hundreds of acres. The plot of ground measures roughly fifteen hundred feet along Massachusetts avenue and an equal distance along the Esplanade. In area it is equal to very nearly five of the large blocks of Salt Lake City. It cost \$750,000.

The buildings will follow classical lines instead of Gothic. No artificial stone will be used in the facades, but instead white Indiana limestone backed by reinforced concrete. The interior courts of the buildings will be faced with light colored brick. The buildings will be substantial, beautiful and will form a great white city which will meet the highest ideals of the famous school of architecture of which the "Tech" boasts.

The general plan of the buildings is that of a continuous group in the center of which is the main or library building with a dome two hundred feet high. Bunker Hill monument would not show above the top of this dome by more than the capstone and a course or two. There will be no detached buildings as such planning is wasteful of space. The students will be able to walk from one class to another without passing from the warm recitation

rooms into the cold. The bother of wraps and coats will be obviated. Time will be saved. The cost of construction, maintenance and heating will be materially lessened. No more than three or four stories will be used. The buildings will be so related to each other that they may grow independently by adding wings in from one to three directions.

Central Building.

The central building with the dome will contain the administration offices and the library. It will be six hundred feet back from the Esplanade. The dome will look down on a central quadrangle three hundred feet square in which will be a heroic figure and shrubbery. The main library will house the books in connection with English literature, history, economics, etc. Radiating from it will be the special engineering libraries, such as the famous collection of electrical books, costing \$100,000. These special libraries will be in the ends of the wings adjacent to the main building. The remainder of the wings will be devoted to the class and drafting rooms as well as the offices of the instructing staff of that branch of engineering housed in that wing. The top floor in each wing will be used as drafting space and will be lighted by saw tooth skylights which will be hidden by the parapet walls. In the rear of the main domed building and against a branch line railroad

will be the power plant and testing laboratories. The power plant will furnish some four thousand horsepower. The convenient access to the railroad will avoid the necessity of hauling heavy and bulky material.

The right hand portion of the ground shown in the illustration will be devoted to the student clubhouse to cost \$200,000, the gymnasium to cost over \$100,000, the common or general dining room, the student dormitories and the athletic field. The clubhouse will accommodate the student activities and provide a recreation center. Adjacent to the gymnasium will be a swimming pool seventy-five feet by thirty.

Special Dormitories.

The dormitories will be of the "staircase" type, where comparatively small groups of men reach their rooms through the same stairway as opposed to the "hotel" type with long corridors and many men using the same stairway. An intimate and homelike atmosphere will be developed. "Fresh air" dormitories with numerous sleeping porches will be provided. There will be an ample supply of shower baths and the best sanitary features. It is estimated that the total cost of the buildings to be devoted to the social life of the students will run not far short of \$1,000,000.

The new buildings will give increased opportunity for the continuation of the high standards of hard work and independent thinking which have prevailed at "Boston Tech." Such pleasure and fun as is consistent with a well rounded life will have better opportunity for expression. As in the past, no attempt will be made to develop athletic stars but rather to conserve and strengthen the health of all the students to the end that they may be able to stand the rigor of the four-year course. To this end and as formerly, "Varsity" football and baseball teams will not be allowed because of the belief that they engender a spirit antagonistic to serious work.

Registration Is 1600.

The present attendance numbers about sixteen hundred of whom about half come from outside of the state of Massachusetts in which the "Boston Tech" is located. Of the total registration, over four hundred are graduates from other colleges, about two hundred and fifty are graduate students and one hundred are young men from foreign countries all over the world.

There is considerable local interest in the new buildings and site for the "Boston Tech" because of the existence of an alumni association here of which Lewis T. Cannon, '96, is president and Gregory M. Dexter, '08, is

Does Your Stomach Trouble You?

May's Wonderful Stomach Remedy Is Successfully Taken in Cases of Stomach, Liver and Intestinal Ailments. And One Dose Has Often Dispelled Years of Suffering.

May's Wonderful Stomach Remedy can really be termed a wonderful remedy, and the benefits that it gives in many of the most chronic cases of Stomach Trouble has spread its fame from one end of the country to the other. No matter where you live—you will find people who have suffered with Stomach, Liver and Intestinal Ailments, etc., and have been restored to health and are loud in their praise of this remedy. There is not a day but what one hears of the wonderful results obtained from this remedy and the benefits are entirely natural, as acts on the source and foundation of these ailments, removing the poisonous catarrh and bile accumulations, taking out the inflammation from the intestinal tract and assists in rendering the same antiseptic. Sufferers are urged to try one dose—which alone should relieve your suffering and convince you that May's Wonderful Stomach Remedy should restore you to good health. Put it to a test to-day—the results will be a revelation to you and you will rejoice over your quick recovery and once again know the joys of living. Send for booklet on Stomach Ailments to Geo. H. May, Mfg. Chemist, 156 Whiting St., Chicago; or better still, obtain a bottle from your druggist. For sale in Salt Lake City, Utah, by Druehl & Franken, Druggists, The Buxy Corner; also old stand, 371 So. Main. (Advertisement.)

My Blood

"Seemed thin, poor, without any sustaining strength. HOOD'S SARSAPARILLA gave me the appetite needed, restored strength, gave me natural, healthful sleep." Mrs. C. K. Tyler, Burlington, Vt.

"MY BLOOD was in bad condition. I had erysipelas on my hands, the left one so bad I had it in a sling 3 months. I believe Hood's Sarsaparilla saved my hand, for when I had used 5 bottles it was all healed up and I felt better every way." Mrs. Alice Stockwell, Worcester, Mass.

"I tell any friends who are beset with dark-brown feelings that Hood's Sarsaparilla will set them up and make them full of life and health. I always feel like 21 after taking a course of this medicine." J. D. Gates, Chicago business man, 510 So. State St. It is HOOD'S that helps.

DUCHESS OF PORTLAND, mistress of the robes for Queen Mary. She objects to shopping for the queen.

AIDE TO THE QUEEN IS GAINING RENOWN

Woman Who Rules Maids of Honor Has Position That Is No Sinecure.

Special Cable to The Tribune.

LONDON, Nov. 15.—In the Duchess of Portland, her new mistress of the robes, Queen Mary has an aide whose stately dignity is everywhere meeting with favorable comment.

The mistress of the robes, who must be a duchess, has the duty of standing next to the queen at state occasions. She has the maids of honor under her control—at times no small job, especially with the recent unexpected outbreaks of suffragetteism in high places.

It is said that the Duchess of Portland stipulated when she assumed her post that she be relieved of the job of "dictating" to the maids of honor, which traditionally and actually had formed a part of the duties of the overseer of the queen's wardrobe.

secretary-treasurer. Its membership includes the following: William E. Risher, '79, mining engineer; C. W. Whitley, '91, general manager American Smelting and Refining company; Lewis T. Parker, '11, Utah Power & Light company; Ralph Emerson, '14, of Ogden; William C. Jennings, '15.

BELIEVES AMERICAN METHODS SUPERIOR

LONDON, Nov. 15.—David Starr Jordan, chancellor of Leland Stanford university, during a lecture today at the Birkbeck institute, under the auspices of the education committee of the London county council, compared American and British university methods, greatly to the detriment of the latter.

The British practice of examination, he declared, is a farce because there is no relation between examination and higher education. "The essential of scholarship," he said, "is to know what to do in life. Therefore, the basic idea of American universities is to give man and woman the opportunity of making use of their powers."

DESERTION CHARGED IN DIVORCE ACTION

SAN FRANCISCO, Nov. 15.—Lloyd Osbourne, stepson of Robert Louis Stevenson, was made the defendant today in an action for divorce brought in the superior court by Katherine D. Osbourne, charging desertion and asking custody of their two minor children.

A property settlement alleged to have been agreed between the two out of court, is embodied in the complaint and the plaintiff asks that it become a part of the decree of divorce.

Mrs. Osbourne was Miss Katherine Durham before her marriage in Honolulu, April 26, 1906. She alleges that she and her husband have lived apart since October, 1907, when she says he deserted her.

DEATH SUMMONS THE FORMER GRAND VIZIER

ROME, Nov. 15.—Kiamli Pasha, formerly grand vizier of Turkey, who has held many high positions in the Ottoman government, is reported to have died at Larnaca, in the island of Cyprus, according to dispatches received here today.

The aged statesman fell from power in February, 1909, when he incurred the enmity of the Young Turks party. Later he took a leading part in the negotiations in the Balkan war, having assumed the office of grand vizier.

ANTI-SLAVERY LAW PASSED BY FILIPINOS

MANILA, Nov. 15.—An anti-slavery law was passed today by the Philippine national assembly after a heated debate.

The measure, which was framed by

HEAD STUFFED? GOT A COLD? TRY PAPE'S

"Pape's Cold Compound" ends colds and grippe in a few hours.

Take "Pape's Cold Compound" every two hours until you have taken three doses, then all gripe misery goes and your cold will be broken. It promptly opens your clogged up nostrils and the air passages of the head; stops nasty discharge or nose running; relieves the headache, dizziness, feverishness, sore throat, sneezing, soreness and stiffness. Don't stay stuffed up! Quit blowing and snuffling. Ease your throbbing head—nothing else in the world gives such prompt relief as "Pape's Cold Compound," which costs only 25 cents at any drug store. It acts without assistance, tastes nice, and causes no inconvenience. Accept no substitute. (Advertisement.)

William H. Phipps, the insular auditor, reaffirms the old Spanish statutes against slavery and incorporates the American laws. The vote in opposition was small in spite of the warmth of the discussion.

Rates Held Reasonable.

WASHINGTON, Nov. 15.—The existing freight rates on champagne of \$2.35 a hundred pounds, from New York to California terminals, were held today by the interstate commerce commission to be reasonable.

Turn the Baby's Tears to Laughter

A Gentle Baby Laxative Will Quickly Relieve the Usual Cause of the Trouble.

It is often difficult to tell just what is the matter with a crying, peevish baby or child too young to express its feelings in words, but as a general rule the mother will find that there is a tendency to constipation, which has brought on a headache or nervousness. The little one has no pain, but feels "out of sorts."

The first thing to try is a family remedy containing good but mild laxative properties, and many mothers will say that their choice would be Dr. Caldwell's Syrup Pepsin. Thousands of mothers keep it in the house for such emergencies, among whom may be mentioned Mrs. John Kirch, Jr., 1527 Abstrait Ave., Pittsburg, Pa. She has been giving it successfully to little Walter, whose picture we present at three months, when he weighed 14½ pounds. He is a healthy, laughing youngster today and Mrs. Kirch gladly gives Dr. Caldwell's Syrup Pepsin credit. It saves many an illness and many a large doctor bill, for by administering it promptly when the first symptoms of illness are noticed it prevents a serious ailment.

It is so pleasant-tasting that no child will refuse it, and as it does not gripe, the child is glad to take it again. A bottle can be obtained of any druggist for fifty cents or one dollar, the latter

WALTER J. KIRCH.

being the size bought by families already familiar with its merits. Results are always guaranteed or money will be refunded.

Syrup Pepsin is for all the family from infancy to old age, and because of its mildness families should prefer it over all other remedies. It is absolutely safe and reliable. You will never again give cathartics, pills, salts or such harsh physics, for they are usually unnecessary, and in the case of children, women and elderly people are a great shock to the system, and hence should be avoided.

Families wishing to try a free sample bottle can obtain it postpaid by addressing Dr. W. B. Caldwell, 419 Washington St., Monticello, Ill. A postal card with your name and address on it will do.

"Yes, It Gives a Queenly Complexion Quickly, Surely"

Long Treasured Secret Formulas That Have Made Valeska Suratt the Most Celebrated Beauty on the Modern Stage.

By Valeska Suratt.

NEVER was I satisfied to have merely a pretty complexion—I demanded an exquisite one. The creams you buy in the store, the lotions prepared are all right in a way, for softening the skin a little, and for those who realize they have to keep up the use of them for months, and perhaps for a year or two before they produce even a slight result. But for one who is unwilling to follow, duck-like, in the beaten track, and who wants a complexion of others will really envy, and wants it quickly, with

little expense, the formula given below is supreme. It is a pity that every woman in the land cannot be apprised of this formula. Two tablespoonfuls of glycerine and one ounce of zintone should be thoroughly mixed with a pint of hot water. After this has cooled, and formed a fine satiny cream it is ready to use. This takes but a few minutes and costs very little compared to what other creams cost which never can compare with this one in results. The zintone costs not more than fifty cents at any drug store. I have known muddy, colorless skins to take on a most exquisite, spotless, pinky white color after using this cream for a short time. It seems as though it rendered the outer skin clear of every blemish and spot, but so purify the skin underneath as well, making a beautiful complexion which will last for years.

MRS. G. O. S.—Your hair will positively stop falling, and will also grow as you never believed it possible if you will use liberally, every day or so, a mixture of one-half pint each of water and alcohol (or one pint of imported hair oil) and one ounce of bethquinal. This is the famous formula which grew my own wealth of hair and gave me the reputation of being the only

woman on the American stage who did not have to wear false hair. This mixture is not only, is delightful to use, surpasses any ordinary "hair tonic" ever known, and can be obtained at any drug store for not more than fifty cents.

JANET T. D.—Yes, the deep wrinkles about the cheeks can be easily removed. The creams already prepared and sold in the stores will not do it. Here is a powerful, wonderfully effective eradicator of wrinkles. Using this for a time will make crows feet and all wrinkles disappear. A trial will prove it. A half pint of hot water, two ounces of eptol and two tablespoonfuls of glycerine should be mixed together. It will form a cream. When cool, apply twice a day. You will soon see an astonishing difference. The eptol costs not more than fifty cents at any drug store. One of the secrets of the success of this formula is that it should be used very liberally. It is not expensive and therefore you can be generous in its use. Do not merely rub it sparingly on the face, but apply it in small masses all over and rub it in thoroughly, stretching and rolling the skin meanwhile.

MISS J. R. R.—Never use reds of any kind. These make the breasts perspire and weaken them. Two teaspoonfuls after each meal and at bed time of a mixture of half a cup of sugar, two ounces of ruseon (which costs one dollar at the drug store), and a half a pint of hot water will produce a decided result in a very short time. Get ruseon by the ounce in the original package, at any drug store.

GEORGINA—Blackheads, large and small, will disappear in a few minutes if you will simply sprinkle some arocin on a sponge made wet with hot water and rub this on the part affected. This never irritates the skin, and saves the skin from becoming spotty by trying to pinch out the blackheads. The arocin will cost fifty cents at drug stores.

MRS. D. H. T.—You will not get rid of your pimples by using any of the ordinary tonics or skin table sold. What you need is a powerful blood cleanser. For this purpose, nothing can surpass the simple mixture of two ounces of sugar, one ounce of arsenic and one-half pint of water. Of this one or two teaspoonfuls three or four times a day will produce a decided result in a very short time. Get arsenic by the ounce in the original package, at any drug store.

PHEBE—I don't wonder that the superfluous hair remover you mention left a red spot, and even then was not a success. Get simple sulfo solution, which is a liquid costing one dollar at the drug store, and apply this to the superfluous hair. This never irritates away the hair, works perfectly, never fails and leaves the skin smooth and unspotted.

MISS C. N. A.—For a shampoo, you will agree with me that nothing can equal the use of a teaspoonful of egg dissolved in half a cup of hot water. It is a cleaner it is unequalled, far better than even the best soap; leaves the hair silky and manageable. The eggs at drug stores cost about twenty-five cents and this will last you for many weeks or for about twelve shampoos. (Advertisement.)
